

**SIMPLICITA<sup>®</sup> filler is ergonomic and very easy to use.**

In its basic version, the only actions required of the operator are:

- Hooking of the container neck on the support fork
- Starting the filling cycle by dual control
- Removal and capping of the full container at the end of the cycle

## THE EASY-TO-USE LIQUID MODULAR DISPENSER

SIMPLICITA<sup>®</sup> Filler is a semi-automatic device for dosing and filling liquids.

An aluminum frame with anti-corrosion treatment and ABS covers allows it to be used for food, pharmaceutical, chemical liquids, etc. thus making it very versatile.

It is customizable **from one to three dosing heads** to adapt to the increase in productivity.

**Fills Politainer™ and traditional containers for liquids.**

### SIMPLICITA<sup>®</sup> Filler main features:

- Container presence control without which there is no delivery of the liquid
- Automatic / manual operation
- Automatic / manual dosages
- Programmable automatic washing cycle
- Emergency stop button
- Collection tank for product spills positioned under the sliding rollers
- Pump not included; pump can be supplied at an additional cost

**ERGONOMIC**

**HIGH-PERFORMANCE**

**FAST**

**CUSTOMIZABLE**
